AMENDMENTS TO THE BRIEF SUMMARY OF THE INVENTION

Please replace the text found in the section entitled "Brief Summary of the Invention," beginning on page 3 at line 1 with the following replacement section:

"The invention is a method of limiting a player's potential loss when playing No Limit Texas Hold 'Em. The invention enables a player who has moved all-in to withdraw from a hand at one of two distinct points thereafter and recover a specific percentage of his all-in wager, less a specific fee or charge for the election. Application of the invention thereby reduces the element of luck in No Limit Texas Hold 'Em.

Although the invention is in the nature of insurance against an unreasonable loss in any given hand, because the invention is a new and unique variant of No Limit Texas Hold 'Em that requires a modification in the manner of play of No Limit Texas Hold 'Em, it is equally accurate to characterize the invention as a new card game, as set forth more specifically in the Specification."
